

## Still

Summer's just a memory  
The night's are turning bitter cold  
I watch the fire and the swaying trees  
Oh they say it's going to snow  
Come over here and sit by me  
Watch the light fade on the hills  
**In this sweet moment**  
**I love you still**

I was once a wild one  
At the mercy of a kiss  
Out with the old and in the new would come  
Then I'd long for what I missed  
Everything's so simple now  
As we watch the light fade on the hills  
**In this sweet moment**  
I love you still

Maybe you'll get weary  
Time has its way with us all  
It's not always easy  
But it's still you I wanna call

I can't promise anything  
Just that I'll be kind  
No solemn vow or wedding ring  
We both left that all behind  
Just come over here and sit by me  
Watch the sun set on the hills  
**In this sweet moment**  
I love you still
