"Back to Shore" marks her third collaboration with her daughter Julia Graff as engineer and producer, along with Julia's partner and fellow graduate of McGill's Master in Music in Sound Recording Program, James Perrella.

Shari tours solo as well as with a trio, quartet and full band - usually including Julia (also a multi-instrumentalist). No matter the format, or whether it's an audience of 40 or 4000, Shari always makes her audiences feel as if they are in her living room.

"My love of music and performing has never waned. I feel more passionate about it than ever and remain utterly enchanted by how music affects us. I feel so grateful to be able to be a part of that experience."
