

**Watching The River Run**

On summer nights when the moon is full  
The warm wind's sigh...I remember it still  
The path we'd walk to the river's edge  
The way my father's eyes spoke when nothing was said  
And I'd take his hand  
And as we walked I'd understand  
That we'd just sit there  
Watching the river run

**All our dreams were there  
Every secret that we shared  
In the setting summer sun  
Watching the river run**

Seasons came and so did love  
We spent our days on the banks by the bluff  
Kisses cool as the water's touch  
We lay down with our promises, secrets and trust  
Side by side  
The sound of the water rushing by  
We'd just lay there  
Watching the river run

**All our dreams were there  
Every secret that we shared  
In the setting summer sun  
Watching the river run**

The tangled web and the day by day  
We soon forget what we lost on the way  
Well I go back, take my child's hand  
Walk that path to the river and sit in the sand  
With her by my side  
The sound of the water rushing by  
We'll just sit there  
Watching the river run

**All our dreams are there  
Every secret that we share  
In the setting summer sun  
Watching the river run  
Watching the river run**
